		175–188 cm = Sport 20"
		>185 cm = Sport 22"

* may require insurance and a license plate, depending on country
 **500W in Switzerland

Powered by the new sporty Cyro Drive Motor, the ST1 X offers the most fun you can have riding in an urban environment. Together with the 618 watt hours delivered by the battery, you can achieve a range of up to 120 km.

A clear, economical design has always been one of the core values at Stromer. This is continued in the 1x11-speed shifting system. By dispensing with a front derailleur and the associated shift lever, the ST1 X presents a clean look allied to persuasive shift performance.

When combined with the Cyro Drive Motor, the 1x11-speed shifting system enables even more dynamic riding.
